S.4	Consensus Mechanism	Proof of Stake (PoS)		
S.5	Incentive Mechanisms and	A Proof-of-Stake (PoS) consensus mechanism		
	Applicable Fees	incentivizes validators to secure the network and		
		validate transactions by staking their own crypto-		
		assets as collateral. Validators are selected to create		
		new blocks based on the amount of cryptocurrency		
		they hold and are willing to 'stake', rather than		
		through computational power. If validators act		
		honestly, they earn rewards through transaction		
		fees; however, malicious behavior or proposing		
		invalid blocks can lead to a reduction of their staked		
		assets, creating an economic penalty that discourages misconduct and ensures network		
		integrity.
