S.5	Incentive Mechanisms and	A Proof-of-Work (PoW) consensus mechanism	
	Applicable Fees	incentivizes miners to secure the network by	
		publishing updates to the ledger in the form of	
		blocks, containing newly submitted and verified	
		transactions. Miners compete to solve	
		cryptographic puzzles, and the first to succeed	
		earns newly minted crypto-assets (block reward)	
		and user-paid transaction fees. Misconduct, such as	
		attempting to add invalid blocks or rewrite the	
		history of the ledger, results in wasted	
		computational resources and opportunity costs,	
		creating an economic penalty that discourages	
6.6		dishonest behavior.
